## PROFESSIONAL SUMMARY

---

Product designer with experience leading complex initiatives from discovery through delivery. Strengths include product strategy, roadmap planning, systems thinking, UX research, and prototyping, with a track record of shaping solutions in ambiguous spaces, aligning cross functional teams, and balancing user needs, business goals, and technical constraints.

## PROFESSIONAL EXPERIENCE

---

### AvidXchange, Inc.

Product Designer | Jun 2023 - Present | Remote

- Progressed from intern to associate to product designer within 2 years, taking on broader ownership across foundational platform work, post general access stabilization, and system level initiatives.
- Drove product direction across vendor records, workflow approvals, spend management, automated invoice retrieval, and notification services by aligning product, engineering, platform, and design systems partners around priorities and solution direction.
- Led discovery, research, usability testing, and prototyping to turn ambiguous problem spaces into end to end solutions and guide trade off decisions from concept through delivery.
- Led roadmap planning for a spend management solution by shaping quarterly priorities and identifying high value opportunities aligned to user needs, business goals, and platform constraints.
- Implemented AI tools Copilot and Figma Make to automate workflows and build production like prototypes that accelerate research, improve usability testing quality, and speed up product validation.

### Under.io

Intern Product Designer | Jun 2022 - Aug 2022 | Chicago, IL

- Delivered 3 handoff ready projects and built an interactive mobile app prototype in Figma to support product direction and implementation.

### VoiceVoice

Product Design contract | Aug 2021 - Sep 2021 | Remote

- Partnered with senior stakeholders to realign homepage priorities and reposition the product for remote work audiences by conducting research to identify pain points and inform redesign strategy.
